Applicants' remarks and amendments, filed on April 19, 2010, have been carefully considered. No claims have been canceled or added; claims 1-6 remain pending in this application.

Substitute Specification

The Substitute Specification filed by Applicants on April 19, 2010 amends the Specification to successfully overcome the objections set forth in the previous Office Action. No new matter has been added in the Substitute Specification.

Withdrawn Objections

The objections to the disclosure and to claim 4, for the informalities therein, have been withdrawn in view of Applicants' Substitute Specification and amendment to claim 4, respectively.

Allowable Subject Matter

1. Claims 1-6 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest the claimed VPO catalyst of the general formula recited in Applicants' claims, specifically the presence of a cyclic nitrogen compound. The prior art also does not teach or suggest the claimed method

for manufacturing 3-cyanopyridine, wherein the aforementioned VPO catalyst is provided and combined with 3-methylpyridine, ammonia, and oxygen at temperatures up to 440°C.

While VPO catalysts are known in the art of ammoxidation processes (e.g., Rao et al., U. S. Patent No. 5,910,465), the prior art does not teach or suggest a VPO catalyst formulaically similar to that instantly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Applicants' Priority Document was filed on February 2, 2006.
